# FIXED WIRING PERIODIC INSPECTION AND TEST REPORT

---

To the best of our knowledge and belief we confirm that the details recorded on this Report Summary and attached forms of Inspections and Test results including any recommendations therein, are a reasonable assessment, within the boundaries of any limitations as agreed or as arising, of the condition of the electrical system.

This Periodic Inspection and Test has been completed, as far as is reasonably practicable, only in those areas available for visual inspection. This excludes areas concealed from inspection e.g. beneath floors, above ceilings and within the general fabric of the building.

The Periodic Inspection and Test of this electrical system has been completed by persons who are competent and have the knowledge and experience suitable to the nature of the system and to the technical standards set down in the relevant British standards & guidelines having employed appropriate test equipment to complete the work.

This page forms an elementary summary of the Inspection and Test report and should only be read in conjunction with the report in its entirety.

NICEIC Enrolment No.  
000500 - 032

## DESCRIPTION AND LOCATION OF SYSTEM INSPECTED

**Agilent Technologies UK Ltd**  
UK & Ireland Service Centre  
610 Wharfedale Road  
Winnersh Triangle  
Wokingham
