

SPANEURO EXPRESS

SPECIALISING IN THE TRANSPORTATION
OF DELICATE EQUIPMENT

SPECIALISTS IN TRANSPORTING DELICATE EQUIPMENT

Experienced and Committed

SpanEuro Express Limited (SpanEuro) specialises in the transportation of delicate equipment on dedicated vehicles throughout Europe. A family owned company, SpanEuro has over 13 years experience in the transportation market and has gained a well earned reputation as a true logistics partner to companies of varying sizes and varying requirements.

SPANEURO
EXPRESS

A proven background in project management, SpanEuro responds to timescales of the tightest degree providing the quickest, safest and most cost effective solutions for transporting goods throughout Europe.

A SpanEuro account manager will oversee the entire process from proposal of cost and activity through to implementation and evaluation. Dedicated vehicles, route plans and drivers are at the core of SpanEuro's customer offering ensuring you receive the highest level of service at all times.

SpanEuro's fleet of vehicles range from transit vans to articulated lorries, with additional enhancements including tail lift and high roofs available as required. All vehicles are maintained regularly and customised to carry a range of delicate equipment.

Transport Services

Getting from A to B is a necessity in everyday life. With over three million commercial vehicles on the road, it can seem confusing as to who to go to for your specific transportation need.

Be it local, multi or international you need to choose a partner who understands and meets your objectives. SpanEuro promises time critical deliveries and the ability to deliver delicate equipment throughout Europe is at the core of its business.

Peace of mind should be standard which is why you will always have a dedicated driver, dedicated vehicle and dedicated SpanEuro account manager overseeing and completing your delivery.

SpanEuro holds both the National and International O Licence to enable the business to operate vehicles over 3.5 tonnes worldwide.

'Anite has used SpanEuro for our biggest European exhibition for a number of years because they offer a reliable and flexible service. With friendly drivers that will go beyond their duty to help us at some of our busiest moments, they are an organisation I would definitely recommend.'

Tech Courier

SpanEuro has over 35 years of European driving experience. Whether it's a small transit van or an articulated lorry, SpanEuro has the expertise and capability to complete the work within the tightest of deadlines all over the UK and mainland Europe.

Focused on the IT industry SpanEuro has gained a wealth of experience handling and transporting delicate, high value items such as server racks, mainframes, scientific apparatus and multimedia technology. Please see Specialised Transport for more details.

Exhibition Services

SpanEuro has a wealth of experience with exhibitions and trade shows throughout Europe. Offering a return service, SpanEuro will safely load your equipment

onto its vehicles and deliver direct to the exhibition. SpanEuro also has the capabilities to assist with the build of stands and positioning of equipment. The team will then return to assist with dismantling the stand before loading all equipment.

Managed Services

Managing Services is an attractive option for any company wishing to ensure its reputation is maintained in delivering to customers without the internal strains of managing a logistics team.

Warehousing and transport are key components of many businesses. Often it's the only time customers 'see' the company they are working with – from the way an item is packaged to the appearance and attitude of drivers and even the vehicle they arrive in.

Many companies don't have the resources internally to manage this crucial area, but by working with SpanEuro your account manager will evaluate and implement your vehicle and warehouse requirements accordingly.

SpanEuro will work with the warehouse and transport team to identify key project requirements and resolve any issues beforehand.

SpanEuro makes it a priority to understand your business. By working in partnership with your team, your account manager and management team will obtain an insight into your business and assign a daily or weekly van itinerary to ensure maximum project efficiency.

By evaluating your business, predetermined routes can be set with a driver allocated to each. Each vehicle and driver will be committed to your daily/ weekly run.

All SpanEuro vehicles feature the company logo, thus ensuring continuity of identity and service levels to your customer.

Bubbles and boxes

SpanEuro's warehouse team will evaluate the goods' requirements to identify the levels of supportive packaging needed. Items may only need a layer of bubble wrap within a box or they may need palletising. Whichever is required, SpanEuro will manage the entire process including incorporating customer logos on the packaging.

Your dedicated warehouse manager will become your daily point of contact. All staff are fully trained and provided with suitable uniform and Personal Protective Equipment (PPE). Managed Services provides huge benefits for companies, including flexibility, cover over holiday periods and contact 24 hours a day, 7 days a week.

'We are extremely pleased with the way our customers prefer to have SpanEuro handle their equipment, rather than relying on standard couriers, and the associated increased risk of damage. The logistics team has integrated well within our organization and allowed us to focus on the technical business we do best.'

UK Service Manager

SOPHISTICATED ELECTRONICS

DELIVERED WITH CARE

Specialist Transport

Delicate or unwieldy, to delivery bay or to data centre, at a customer site or an exhibition hall, SpanEuro do it all, every day. With pride and passion that is still as strong as the day the company formed.

Often couriers providing a multi-drop service are sometimes deemed the most obvious choice for delicate and exhibition deliveries. Seemingly cheaper, they often come with higher risks of damaging goods, frenetic delivery times which are not to schedule and even lost items. Without a main point of contact, multi-drops will recruit a number of companies, personnel and distribution houses to handle certain points of the delivery process. Surely it is possible to partner with one company to oversee the entire process for you at a competitive rate?

It is with SpanEuro. Providing a dedicated service at sensible rates you will receive a personal account manager instructing a dedicated driver and vehicle giving you peace of mind that delicate goods will be delivered to the destination within the agreed timescale, to budget and intact.

"Thanks for all your great service this year, SpanEuro continue to deliver a high quality solution."

Virgin Media

EFFICIENT, DEDICATED SERVICE AT SENSIBLE RATES

Vehicle specification for the Electronic, Multimedia, Telecommunications, Test and Measurement, Scientific and Healthcare industries where goods may require adapted transportation includes:
